

ImGuiStorage::GetBool

ImPool< ImGuiTabBar
>::GetByKey

ImGui::TreeNodeBehaviorIsOpen

ImGuiStorage::GetInt

```
graph LR; A[ImGuiStorage::GetBool] --> D[ImGuiStorage::GetInt]; B[ImPool< ImGuiTabBar >::GetByKey] --> D; C[ImGui::TreeNodeBehaviorIsOpen] --> D;
```

The diagram illustrates a dependency or call relationship. Three source functions, each in a white box with a black border, are positioned on the left. Blue arrows point from each of these source functions to a single target function, 'ImGuiStorage::GetInt', which is located on the right and highlighted with a gray background and a black border. The target function box is wider than the source boxes. The arrows originate from the right side of the source boxes and converge on the left side of the target box.
